Experienced in interdisciplinary collaboration across art, technology, and perception studies, excelling in teamwork with diverse groups. A fast learner with a proactive approach to exploring new areas and transforming ideas into detailed, actionable research plans. My work has led to demos and publications at top-tier conferences, including SIGGRAPH, UIST, VRST, TEI, and DIS.

Skills: JavaScript, C/C++, Python, WebGL, WebXR, Unity, Unreal Engine, Matlab, Arduino.

Professional Experience

New York University, Future Reality Lab

Supervisor: Prof. Ken Perlin

STUDENT RESEARCHER

Aug. 2021 – present

- Developed a WebXR-based collaborative mixed reality platform with a customized shader and multimodal interfaces, deployed in research projects and graduate-level VR courses at NYU and KAIST. | Github | Demo
- Built 3D content creation tools in VR using data-driven generative model, with the project receiving the Best Paper Award at ACM VRST 2024.
- Explored audio-based pseudo-haptics with audio and perception researchers to enhance virtual experiences via perception modeling.
- Developed robotic interfaces for mixed reality experiences, enabling haptic feedback and the actuation of passive objects. | Demo1 | Demo2

MIT Media Lab, Tangible Media Group

Supervisor: Prof. Hiroshi Ishii

RESEARCH INTERN

Jun. 2021 – Dec. 2021

- Led the design and development of a new version of SandScape for permanent exhibition in the MIT Museum—a tangible interface for designing and exploring landscapes by manipulating sand with real-time simulations projected onto the sandbox. | Gallery
- Utilized openFrameworks (C++) and libigl to reconstruct the 3D mesh of the SandScape sandbox in real-time. Developed dynamic simulations to visualize features such as elevation, slope, and water drainage. | Github

MiSynth

CEO: Senaida Ng

SOFTWARE ENGINEER

Sep. 2020 – Jan. 2021

- MiSynth is a startup company that uses synaptic technology and brain-computer interfaces for music creation. | Website
- Created data steaming pipeline from Emotive brainwave collecting headset to front-end music creation software in JavaScript
- Developed web-based user interaction interfaces for EEG-based music creation in JavaScript.
- Won the Most Impact Award in NYC Media Lab and ASCAP Immersive Studio Challenge. | News

Harvard Medical School

Supervisor: Dr. Michael Chou

DATA VISUALIZATION DESIGNER

Sep. 2020 – Jan. 2021
